

Mathematics Progression Document

This is intended to be a spiral curriculum. Pupils should be taught National Curriculum objectives but should be supported to catch up.

End Points (Threshold Concepts)		Milestones					
		KS1		Lower KS2		Upper KS2	
		Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
To know and use numbers (This concept involves understanding the number system and how they are used in a wide variety of mathematics ways)	Counting	<ul style="list-style-type: none"> Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number. Count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens. Given a number, identify one more and one less Pupils should be able to successfully respond to questions such as: Count forwards from 36, etc. Point to the third object in the line. Show me 8 cubes. Pupils should be able to give their own reasoned ideas 	<ul style="list-style-type: none"> Count in steps of 2, 3, and 5 and 10 from 0, and in tens from any number, forward or backward To be able to contextualise their understanding of number through real-life situations. E.g., use of money. 	<ul style="list-style-type: none"> Count from 0 in multiples of 4, 8, 50 and 100 Find 10 or 100 more or less than a given number To be able to work systematically in response to a given problem. 	<ul style="list-style-type: none"> Count backwards through zero to include negative numbers Count in multiples of 6, 7, 9, 25 and 1 000 Find 1 000 more or less than a given number To identify missing numbers using a number line, including negative numbers. To work out numbers in sequences, including identifying the 'rule' or pattern of the sequence. 	<ul style="list-style-type: none"> Count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 and negative whole numbers, including through zero To explore numbers bigger than 1 million. E.g. Write 1 million in digits. Write down the number that is 1 more than 1 million. 	<ul style="list-style-type: none"> Use negative numbers in context, and calculate intervals across zero To use knowledge of rounding to aid estimation. To be able to perform mental calculations working with large numbers. To be able to work systematically in response to a given problem, including multi-step problems.

		<p>on sets of numbers: E.g., 71 is the odd one out because it is not a multiple of 5.</p>				<ul style="list-style-type: none"> • Write down the number that is 10 more than 1 million. • Write down the number that is 100 more than 1 million. • To apply rules for rounding to numbers beyond Year 5 expectations. 	
	Representing	<ul style="list-style-type: none"> • Identify and represent numbers using objects and pictorial representations including the number line • Read and write numbers from 1 to 20 in numerals and words. 	<ul style="list-style-type: none"> • Identify, represent and estimate numbers using different representations, including the number line • Read and write numbers to at least 100 in numerals and in words • To be able to identify and estimate missing numbers E.g., in number sentences and on number lines. 	<ul style="list-style-type: none"> • Identify, represent and estimate numbers using different representations • Read and write numbers up to 1 000 in numerals and in words • To be able to partition numbers in a range of ways. 	<ul style="list-style-type: none"> • Identify, represent and estimate numbers using different representations • Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. 	<ul style="list-style-type: none"> • Read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit 	<ul style="list-style-type: none"> • Read, write, order and compare numbers up to 10 000 000 and determine the value of each digit

					<ul style="list-style-type: none"> • To find different ways of representing numbers using concrete resources, pictorial representations and abstract notation. • To be able to use roman numerals to represent numbers 		
	Comparing	<ul style="list-style-type: none"> • Use the language of: equal to, more than, less than (fewer), most, least • Pupils should be able to compare amounts 	<ul style="list-style-type: none"> • Compare and order numbers from 0 up to 100; use <, > and = signs • Be able to identify greater than/less than relationships, including use of <> symbols. 	<ul style="list-style-type: none"> • Compare and order numbers up to 1 000 • To use mathematical reasoning to explain logical answers to questions 	<ul style="list-style-type: none"> • Order and compare numbers beyond 1 000 • To use mathematical reasoning to explain logical answers to questions 	<ul style="list-style-type: none"> • Read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit • To use mathematical reasoning to explain logical answers to questions 	<ul style="list-style-type: none"> • Read, write, order and compare numbers up to 10 000 000 and determine the value of each digit • To use mathematical reasoning to explain logical answers to questions

	<p>Place value</p>	<ul style="list-style-type: none"> • To use practical resources to represent 2 digit numbers. 	<ul style="list-style-type: none"> • Recognise the place value of each digit in a two-digit number (tens, ones) • To use practical resources to deepen understanding of place value. 	<ul style="list-style-type: none"> • Recognise the place value of each digit in a three-digit number (hundreds, tens, ones) • To use practical resources to deepen understanding of place value. 	<ul style="list-style-type: none"> • Recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) • round any number to the nearest 10, 100 or 1 000 • To use practical resources to deepen understanding of place value. 	<ul style="list-style-type: none"> • Read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit • round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000 • To use practical resources to deepen understanding of place value. 	<ul style="list-style-type: none"> • Read, write, order and compare numbers up to 10 000 000 and determine the value of each digit. • round any whole number to a required degree of accuracy • To use practical resources to deepen understanding of place value.
--	---------------------------	--	---	---	---	---	---

	Solving problems		<ul style="list-style-type: none"> • Use place value and number facts to solve problems 	<ul style="list-style-type: none"> • Solve number problems and practical problems involving these ideas. 	<ul style="list-style-type: none"> • Solve number and practical problems that involve all of the above and with increasingly large positive numbers 	<ul style="list-style-type: none"> • Solve number problems and practical problems that involve all of the above • To be able to work systematically in response to a given problem, including multi-step problems. 	<ul style="list-style-type: none"> • Solve number and practical problems that involve all of the above • To be able to work systematically in response to a given problem, including multi-step problems.
Add and subtract (This concept involves understanding both the concepts and processes of addition and subtraction)	Complexity	<ul style="list-style-type: none"> • Read, write and interpret mathematical statements involving addition (+), subtraction (−) and equals (=) signs • Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as: $7 = \cdot - 9$ 	<ul style="list-style-type: none"> • Applying their increasing knowledge of mental and written methods. • Compare number sentences 	<ul style="list-style-type: none"> • Solve addition and subtraction one-step problems in contexts, deciding which operations and methods to use and why. 	<ul style="list-style-type: none"> • Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. 	<ul style="list-style-type: none"> • Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why 	<ul style="list-style-type: none"> • Use their knowledge of the order of operations to carry out calculations involving the four operations

		<ul style="list-style-type: none"> • Compare number sentences 					
	Methods	<ul style="list-style-type: none"> • Add and subtract one-digit and two-digit numbers to 20, including zero • Add by counting on. • Subtract by counting back. • Add ones using number bonds 	<ul style="list-style-type: none"> • Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> ♣ a two-digit number and ones ♣ a two-digit number and tens ♣ two two-digit numbers ♣ adding three one-digit numbers • show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot 	<ul style="list-style-type: none"> • Pupils should be taught to: <ul style="list-style-type: none"> ♣ add and subtract numbers mentally, including: <ul style="list-style-type: none"> ♣ a three-digit number and ones ♣ a three-digit number and tens ♣ a three-digit number and hundreds • Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction 	<ul style="list-style-type: none"> • Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate 	<ul style="list-style-type: none"> • Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) • Add and subtract numbers mentally with increasingly large numbers 	

			<p>add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</p> <ul style="list-style-type: none"> * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers 				
	Checking	<ul style="list-style-type: none"> • Represent the calculation pictorially to prove the answer. 	<ul style="list-style-type: none"> • Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems. 	<ul style="list-style-type: none"> • Estimate the answer to a calculation and use inverse operations to check answers 	<ul style="list-style-type: none"> • Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy 	<ul style="list-style-type: none"> • Use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy. 	<ul style="list-style-type: none"> • Represent the calculation pictorially to prove the answer.

	Using number facts	<ul style="list-style-type: none"> • Represent and use number bonds and related subtraction facts within 20 	<ul style="list-style-type: none"> • Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 	<ul style="list-style-type: none"> • Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. 	<ul style="list-style-type: none"> • Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. 		<ul style="list-style-type: none"> • Add and subtract negative integers • Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
Multiply and divide (This concept involves understanding both the concepts and processes of multiplication and division)	Complexity	<ul style="list-style-type: none"> • Solve problems involving multiplying and dividing, using concrete objects and pictorial representations 	<ul style="list-style-type: none"> • Solve problems involving multiplying and dividing, using materials, arrays, repeated addition 	<ul style="list-style-type: none"> • Solve problems involving multiplying and dividing, including, using the distributive law to multiply two digit numbers by one digit 	<ul style="list-style-type: none"> • Solve problems involving missing numbers, including integer scaling problems and harder correspondence problems (such as n objects are connected to m objects) 	<ul style="list-style-type: none"> • Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign. 	<ul style="list-style-type: none"> • Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.
	Methods	<ul style="list-style-type: none"> • Group amounts using arrays to calculate the total Understand the concept of 'lots of' 	<ul style="list-style-type: none"> • Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication 	<ul style="list-style-type: none"> • Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including 	<ul style="list-style-type: none"> • Multiply two-digit and three-digit numbers by a one-digit number using formal written layout 	<ul style="list-style-type: none"> • Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication 	<ul style="list-style-type: none"> • Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication

			(\times), division (\div) and equals (=) signs	for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Mental Methods)		for two-digit numbers	
Checking			<ul style="list-style-type: none"> Use known multiplication facts to check the accuracy of calculations 	<ul style="list-style-type: none"> Use known multiplication facts to check the accuracy of calculations 	<ul style="list-style-type: none"> Estimate and use inverse operations to check answers to a calculation 		<ul style="list-style-type: none"> Use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy
Using multiplication and division facts	<ul style="list-style-type: none"> Count in multiples of twos, fives and tens The <i>number</i> of coins in a set is different from the <i>value</i> of the coins in a set; knowledge of counting in groups of two, five or ten can be used to work out the value of a 	<ul style="list-style-type: none"> Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers Explore the relationship between 5 and 10. 	<ul style="list-style-type: none"> Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables. Explore the relationship between 4 and 8. 	<ul style="list-style-type: none"> Recall multiplication and division facts for multiplication tables up to 12×12 Explore times table patterns including generalising about the product in terms of odd/even factors, reviewing divisibility rules, and exploring 	<ul style="list-style-type: none"> Identify common factors, common multiples and prime numbers. Establish whether a number up to 100 is prime and recall prime numbers up to 19. Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000. 	<p>Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3).</p> <p>Solve problems involving multiplication and division including using knowledge of factors and multiples, squares and cubes</p> <ul style="list-style-type: none"> Use knowledge of order of operations to carry 	

		set of identical low-denomination coins.			square numbers.		out calculations involving the four operation
Fractions (This concept involves understanding the concept of part and whole and the ways of calculating using it)	Counting in fractional steps	<ul style="list-style-type: none"> • Pupils should count in fractions up to 10, starting from any number and using the $\frac{1}{2}$ and $\frac{2}{4}$ equivalence on the number line (Non Statutory Guidance) 	<ul style="list-style-type: none"> • Count up and down in tenths. 	<ul style="list-style-type: none"> • Count up and down in hundredths. 	<ul style="list-style-type: none"> • Pupils should count in fractions up to 10, starting from any number and using the $\frac{1}{2}$ and $\frac{2}{4}$ equivalence on the number line (Non Statutory Guidance) 	<ul style="list-style-type: none"> • Count up and down in tenths. 	<ul style="list-style-type: none"> • Count up and down in hundredths.
	Recognising fractions	<ul style="list-style-type: none"> • Recognise, find and name a half as one of two equal parts of an object, shape or quantity. • Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity. 	<ul style="list-style-type: none"> • Recognise, find, name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{2}{4}$, and $\frac{3}{4}$ of a length, shape, set, of objects or quantity. 	<ul style="list-style-type: none"> • Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators. • Recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10. 	<ul style="list-style-type: none"> • Recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten. 	<ul style="list-style-type: none"> • Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence). 	<ul style="list-style-type: none"> • Recognise, find and name a half as one of two equal parts of an object, shape or quantity.

				<ul style="list-style-type: none"> • Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators. 			
	Decimals	<ul style="list-style-type: none"> • Compare numbers with the same number of decimal places up to two decimal places. • Round decimals with one decimal place to the nearest whole number. 	<ul style="list-style-type: none"> • Read, write, order and compare numbers with up to three decimal places. • Round decimals with two decimal places to the nearest whole number and to one decimal place. 	<ul style="list-style-type: none"> • Identify the value of each digit in numbers given to three decimal places. • Solve problems which require answers to be rounded to specified degrees of accuracy 	<ul style="list-style-type: none"> • Compare numbers with the same number of decimal places up to two decimal places. • Round decimals with one decimal place to the nearest whole number. 	<ul style="list-style-type: none"> • Read, write, order and compare numbers with up to three decimal places. • Round decimals with two decimal places to the nearest whole number and to one decimal place. 	<ul style="list-style-type: none"> • Identify the value of each digit in numbers given to three decimal places. • Solve problems which require answers to be rounded to specified degrees of accuracy
	Equivalence		<ul style="list-style-type: none"> • Write simple fractions e.g. $\frac{1}{2}$ of $6 = 3$ • Recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$ 	<ul style="list-style-type: none"> • Recognise and show, using diagrams, equivalent fractions with small denominators. 	<ul style="list-style-type: none"> • Recognise and show, using diagrams, families of common equivalent fractions. 	<ul style="list-style-type: none"> • Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths. • Read and write decimal numbers as fractions (e.g. $0.71 = \frac{71}{100}$) 	<ul style="list-style-type: none"> • Use common factors to simplify fractions; use common multiples to express fractions in the same denomination. • Associate a fraction with division and calculate decimal equivalents (e.g.

						<ul style="list-style-type: none"> • Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents. 	<ul style="list-style-type: none"> • 0.375) for a simple fraction (e.g. 3/8).
	Addition and Subtraction of Fractions			<ul style="list-style-type: none"> • Add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$) 	<ul style="list-style-type: none"> • Add and subtract fractions with the same denominator. 	<ul style="list-style-type: none"> • Add and subtract fractions with the same denominator and multiples of the same number. • Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements, 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1 \frac{1}{5}$) 	<ul style="list-style-type: none"> • Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.
	Multiplication and Division of Decimals				<ul style="list-style-type: none"> • Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the 		<ul style="list-style-type: none"> • Multiply one-digit numbers with up to two decimal places by whole numbers.

					answer as ones, tenths and hundredths.	<ul style="list-style-type: none">• Multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places.• Identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places.• Associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $\frac{3}{8}$).• Use written division methods in cases where the answer has
--	--	--	--	--	---	---

							up to two decimal places.
	Problem Solving			<ul style="list-style-type: none"> • Solve problems that involve all of the above. 	<ul style="list-style-type: none"> • Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number. • Solve simple measure and money problems involving fractions and decimals to two decimal places. 	<ul style="list-style-type: none"> • Solve problems involving numbers up to three decimal places. • Solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$ $\frac{1}{4}$ $\frac{1}{5}$ $\frac{2}{5}$ $\frac{4}{5}$ and those with a denominator of a multiple of 10 or 25. 	
Understand the properties of shapes (This concept involves recognising the names and properties of geometric shapes and angles)	Identifying Shapes and their Properties	<ul style="list-style-type: none"> • Recognise and name common 2-D and 3-D shapes, including: <ul style="list-style-type: none"> * 2-D shapes [e.g. rectangles (including squares), circles and triangles] * 3-D shapes [e.g. cuboids (including cubes), pyramids and spheres]. 	<ul style="list-style-type: none"> • Identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line • identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces 		<ul style="list-style-type: none"> • Identify lines of symmetry in 2-D shapes presented in different orientations • Apply this understanding to halving of objects. 	<ul style="list-style-type: none"> • Identify 3-D shapes, including cubes and other cuboids, from 2-D representations <p>Related to careers e.g. bricklaying.</p> <p>Stacking cupboards after shopping considering shapes and space. Linked shapes.</p>	<ul style="list-style-type: none"> • Recognise, describe and build simple 3-D shapes, including making nets (appears also in Drawing and Constructing) • Illustrate and name parts of circles, including radius, diameter and circumference and know that the

		<ul style="list-style-type: none"> • Recognising shapes in the environment e.g. wheels on a car. • Understanding functionality of shapes e.g. round wheels. 	<p>identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]</p> <ul style="list-style-type: none"> • Using vocabulary appropriately and consistently 			Shapes and their purpose.	diameter is twice the radius
	Drawing & Constructing		<ul style="list-style-type: none"> • distinguish between regular and irregular polygons based on 	<ul style="list-style-type: none"> • draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them • Model making and construction. 	<ul style="list-style-type: none"> • complete a simple symmetric figure with respect to a specific line of symmetry 	<ul style="list-style-type: none"> • draw given angles, and measure them in degrees (°) • Map reading – compass bearings • Clocks and time 	<ul style="list-style-type: none"> • draw 2-D shapes using given dimensions and angles • Careers education e.g. bricklaying • recognise, describe and build simple 3-D shapes, including making nets (appears also in Identifying Shapes and Their Properties) • Model making and construction. Measuring areas e.g. carpet fitting.
	Comparing & Classifying		<ul style="list-style-type: none"> • compare and sort common 2-D and 3-D shapes and everyday objects • Understanding functionality of shapes e.g. round wheels. 		<ul style="list-style-type: none"> • compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes. 	<ul style="list-style-type: none"> • use the properties of rectangles to deduce related facts and find missing lengths and angles 	<ul style="list-style-type: none"> • compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles,

					<ul style="list-style-type: none"> • Reading road signs, hazards and warnings 	<ul style="list-style-type: none"> • Joinery etc. / carpet fitting • reasoning about equal sides and angles 	quadrilaterals, and regular polygons <ul style="list-style-type: none"> • Understanding functionality of shapes e.g. round wheels.
	Angles			<ul style="list-style-type: none"> • Recognise angles as a property of shape or a description of a turn Time <ul style="list-style-type: none"> • Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle • Recognising in the community • Identify horizontal and vertical lines and pairs of perpendicular and parallel lines • Recognising in the community. ICT skills e.g. underlining text 	<ul style="list-style-type: none"> • Identify acute and obtuse angles and compare and order angles up to two right angles by size 	<ul style="list-style-type: none"> • Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles Identify: <ul style="list-style-type: none"> * angles at a point and one whole turn (total 360°) * angles at a point on a straight line and 1/2 a turn (total 180°) * other multiples of 90° <ul style="list-style-type: none"> • Time, body position, positional language, taking directions, map reading, compass bearings. 	<ul style="list-style-type: none"> • Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles • Recognising in the community, time, body position, positional language, taking directions, map reading, compass bearings.

<p>Describe position, direction and movement (This concept involves recognising various types of mathematical movements)</p>		<ul style="list-style-type: none"> • Describe position, direction and movement, including half, quarter and three-quarter turns. 	<ul style="list-style-type: none"> • Use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise) • Order and arrange combinations of mathematical objects in patterns and sequences 		<ul style="list-style-type: none"> • Describe positions on a 2-D grid as coordinates in the first quadrant <ul style="list-style-type: none"> • Plot specified points and draw sides to complete a given polygon • Plot specified points and draw sides to complete a given polygon 	<ul style="list-style-type: none"> • Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed 	<ul style="list-style-type: none"> • Describe positions on the full coordinate grid (all four quadrants) • Draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
--	--	---	--	--	---	---	--

<p>Use measures (This concept involves becoming familiar with a range of measures, devices used for measuring and calculations)</p>		<ul style="list-style-type: none"> • Compare, describe and solve practical problems for: <ul style="list-style-type: none"> * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] * time [e.g. quicker, slower, earlier, later] • Measure and begin to record the following: 	<ul style="list-style-type: none"> • Compare and order lengths, mass, volume/capacity and record the results using >, < and = • Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value • Find different combinations of coins that equal the same amounts of money • Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change • Compare and sequence intervals of time • Tell and write the time to five minutes, including quarter 	<ul style="list-style-type: none"> • Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml) • Measure the perimeter of simple 2-D shapes • add and subtract amounts of money to give change, using both £ and p in practical contexts • Tell and write the time from an analogue clock, including using <ul style="list-style-type: none"> • Roman numerals from I to XII, and 12-hour and 24-hour clocks • Estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of 	<ul style="list-style-type: none"> • Convert between different units of measure [for example, kilometre to metre; hour to minute] • Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres • Find the area of rectilinear shapes by counting squares • Estimate, compare and calculate different measures, including money in pounds and pence <p>Mathematics – key stages 1 and 2 28 Statutory requirements</p> <ul style="list-style-type: none"> • Read, write and convert time between analogue and 	<ul style="list-style-type: none"> • Convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre) • Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints • Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres • Calculate and compare the area of 	<ul style="list-style-type: none"> • Compare, describe and solve practical problems for: <ul style="list-style-type: none"> * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] * time [e.g. quicker, slower, earlier, later]

		<p>days of the week, weeks, months and years</p> <p>♣ Tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</p>				<p>volume, money] using decimal notation, including scaling.</p>	<p>relating to dates, including days of the week, weeks, months and years</p> <p>♣ Tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</p>
<p>Use statistics (This concept involves interpreting, manipulating and presenting data in various ways)</p>	<p>Interpreting, constructing and presenting data</p>		<ul style="list-style-type: none"> • Interpret and construct simple pictograms, tally charts, block diagrams and simple tables • ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity • ask and answer questions about totalling and comparing categorical data 	<ul style="list-style-type: none"> • Interpret and present data using bar charts, pictograms and tables • Solve one-step and twostep questions 'How many more?' and 'How many fewer?' using information presented in scaled bar charts and pictograms and tables 	<ul style="list-style-type: none"> • Interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs • Solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs. 	<ul style="list-style-type: none"> • Complete, read and interpret information in tables, including timetables • Solve comparison, sum and difference problems using information presented in a line graph 	<ul style="list-style-type: none"> • Interpret and construct pie charts and line graphs and use these to solve problems • Calculate and interpret the mean as an average

	Solving Problems	<ul style="list-style-type: none"> • solve one-step and two step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables. 	<ul style="list-style-type: none"> • solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs. 	<ul style="list-style-type: none"> • solve comparison, sum and difference problems using information presented in a line graph 	<ul style="list-style-type: none"> • calculate and interpret the mean as an average 	<ul style="list-style-type: none"> • solve one-step and two step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables. 	<ul style="list-style-type: none"> • solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.
Use algebra (This concept involves recognising mathematical properties and relationships using symbolic representations)	Equations	<ul style="list-style-type: none"> • solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \cdot - 9$ <p>(copied from Addition and Subtraction)</p> <p><i>represent and use number bonds and related subtraction facts within 20</i> (copied from Addition and Subtraction)</p>	<ul style="list-style-type: none"> • recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction) <p><i>(recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100</i> (copied from Addition and Subtraction)</p>	<ul style="list-style-type: none"> • solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. (copied from Addition and Subtraction) <p><i>(solve problems, including missing number problems, involving multiplication and division, including integer scaling</i> (copied from Multiplication and Division)</p>			<ul style="list-style-type: none"> • use the properties of rectangles to deduce related facts and find missing lengths and angles (copied from Geometry: Properties of Shapes) find pairs of numbers that satisfy number sentences involving two unknowns

	Formuale				<ul style="list-style-type: none"> • Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit. (Copied from NSG measurement) 		<ul style="list-style-type: none"> • use simple formulae • recognise when it is possible to use formulae for area and volume of shapes (copied from Measurement)
	Sequences	<ul style="list-style-type: none"> • sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening (copied from Measurement) 	<ul style="list-style-type: none"> • compare and sequence intervals of time (copied from Measurement) 				<ul style="list-style-type: none"> • generate and describe linear number sequences

A good mathematician will have:

- An understanding of the important concepts and an ability to make connections within mathematics.
- A broad range of skills in using and applying mathematics.
- Fluent knowledge and recall of number facts and the number system.
- The ability to show initiative in solving problems in a wide range of contexts, including the new or unusual.
- The ability to think independently and to persevere when faced with challenges, showing a confidence of success.
- The ability to embrace the value of learning from mistakes and false starts.

- The ability to reason, generalise and make sense of solutions.
- Fluency in performing written and mental calculations and mathematical techniques.
- A wide range of mathematical vocabulary.
- A commitment to and passion for the subject.
